# Mechanical Seals

Mechanical Seal Engineering understands the value of keeping your operations running smoothly and reducing downtime in your business. With over of 35 years of experience and servicing thousands of clients across every major region in Australia, our Australian-owned company stands as a model of excellence in the mechanical seal industry. We have the globally recognised ISO 9001:2015 certification, ensuring the quality of our mechanical services, including sales, distribution, manufacturing, and repair.

As your business partner, we offer tailored solutions, short lead times, and a large stock, including over 20,000 component seals, to efficiently meet all your sealing needs. Our team of expert engineers and tradespeople provides you with reliable, high-quality solutions that contribute to the success of your business.

## Dedicated to customer service

Choose a supplier that offers comprehensive end-to-end services—one that not only installs but also tests, manages, refurbishes, repairs, converts, provides reports, offers technical advice, and truly understands your needs throughout its lifecycle. What our clients have to say:

“We have been relying on MSE’s services for the last 10 years or so and are very happy with all aspects of your business.”

**JAMES BROUWER**  
*AdelaideAqua*

“The product and service are both excellent. The knowledge base is great and has been very helpful over the years.”

**CRAIG SCHIER**  
*Schier Engineering*

# 20,000+ Mechanical Seals in Stock.

## REPAIRS & REFURBISHMENT

Our fully equipped facility is dedicated to mechanical seal repairs and conversions. Our experienced team employs top-of-the-line pressure testing procedures and implements rigorous Quality Assurance to guarantee smooth onsite installation. We present a superior alternative to the lengthy lead times offered by multinational competitors, thus boosting efficiency and cost-effectiveness for your business.

## SEAL FAILURE REPORTS

We offer seal failure reports to improve production and long term reliability. We work with our customers to strive for maximum efficiency and minimum break downs to reduce down time and increase productivity.

## COMPONENT SEALS

We supply component seals for pumps, mixers, agitators and compressors. We offer replacement aftermarket equivalent seals for John Crane, Chesterton, Flowserve, EagleBurgmann, Pac, AES, Sealol, Roten, BT, Flygt, ABS, Ebara, Tsurumi, Grundfos and more.

## CARTRIDGE SEALS

We offer high quality cartridge seals at very competitive prices. We use the latest technology and materials to improve pump reliability and reduce running costs.

## GLAND PACKING

We stock a large amount of high quality gland packing for general applications, slurry, high speed and chemical applications.

## BEARING ISOLATORS

We are a distributor for Inpro bearing isolators, the inventor of the original bearing isolator and world leader in this technology.

## GASKET SHEETING

We stock a large range of gasket sheeting and have a large supply chain through out the country to help you choose the right gasket sheeting for all products, temperatures and pressures.

## TECHNICAL CONSULTANCY

We offer technical advice such as material selection, stuffing box piping plans, design problem solving and any other seal related issues. We work with our customers to optimize operating conditions.
